Summer school

10th - 15th of June 2018
LPG-BIAF, Angers
France

Living benthic foraminifera in coastal environments

Integrated experimental approaches

Topics of lectures:
Foraminiferal biology
Foraminifera in subtidal coastal environments
Characterisation of the foraminiferal microhabitats: early diagenesis
Genetics and Barcoding
High-resolution core sampling
Submillimeter chemical profiling
Fluorescent probing
Metabolism: Respiration rate
Practical sessions & Field trip

Main lecturers
Pr. Joan Bernhard (USA)
Dr. Bruno Jesus (France)
Dr. Hidetaka Nomaki (Japan)
Dr. Nils Risgaard-Petersen (Denmark)
Pr. Emmanuelle Geslin (LPG-BIAF)
Pr. Frans Jorissen (LPG-BIAF)
Dr. Aurélia Mouret (LPG-BIAF)
Dr. Edouard Metzger (LPG-BIAF)
Dr. Magali Schweizer (LPG-BIAF)

Participant profile:
Master and PhD students, postdocs, environmental consultancies/agencies

Language: English

Correspondence and information:
